Setting up HPL email in Thunderbird

1. Enter your full name. Enter your email address as username@umces.edu. Click continue.

2. It will say "Looking up configuration: email provider", click "Manual Config"
3. For incoming: server type is IMAP, the server address is hpl.hpl.umces.edu, port is 993, SSL is SSL/TLS. For Outgoing: server address is also hpl.hpl.umces.edu, port is 587, SSL is STARTTLS. Username is just your username, without @umces.edu. Click “Re-test”, and it should confirm your settings. Then click “Done”.
