| EIC | WALL NEXT TO BATHROOM | 2/14/2020 |

Notes:

Every kit has a "standardized" list, noted on the outside of it. It will list items/quantity that it should contain.

Many kits will have extras specific to that location. For instance, EE is stocked with calamine lotion and poison ivy scrub.

Every maintenance vehicle is also equipped with a small first aid kit.

Kits will be checked by EHS 2x/year for expired materials, as well as for stocked components.

If at any time you are looking for something within one and it's not there, please contact EHS at xt 8441.
