As of fall 2021, UMCES began requiring all faculty, staff and students to be vaccinated against COVID-19. By checking this box, you agree that you will be fully vaccinated against COVID-19 by the start of the IMET Summer Internship. You also agree to comply with all COVID-19 procedures in place at IMET at the time.

I agree

Education:

1. Where you attended high school:

Name Location

2. The institution you currently attend:

Name Location

2. Most recent completed year in college: Freshman ___ Sophomore ___ Junior ___ Senior ___

3. Major: _____

4. Expected graduation date (MM/YYYY): _____

5. Current GPA: _____

7. Please list all courses in progress that are not shown in your unofficial transcript:

Course, subject, grade, date completed or "In Progress"

8. List any research internships you have completed:

9. List any honors you have received, honorary organizations to which you belong and offices held:

10. Would you like IMET to make your application available to other marine summer internship programs?

Yes ___ No ___

IMET SUMMER INTERNSHIP

- The mission of the Institute of Marine and Environmental Technology (IMET) is to apply the tools of modern biology and biotechnology to study, protect and enhance marine and estuarine resources. The summer internship will provide orientation to working in a lab, seminars on the use of molecular techniques in fisheries and environmental research, a one-day workshop on communicating science, and a research project with an IMET faculty mentor.
- IMET is housed in a technologically advanced research facility. All rules and regulations of conduct must be followed for your safety and the safety of others. These rules and regulations will be described during the Orientation Session, to be held Monday, June 6 2022.
- Our plan is to provide research opportunities in person at IMET's laboratories. If COVID restrictions prevent us from hosting in-person interns in the summer of 2022, we will do our best to adjust and will inform our applicants of any changes.
- The duration of the internship is Monday, June 6 through Friday, August 5, 2022. It is a **full-time position. Please do not apply if you can only be here for part of the specified time, have another job or are attending classes during the day.** Final reports will be presented on Friday, August 5. Friends and family are encouraged to attend this event.
- You are expected to participate fully in the daily operation of the laboratory to which you are assigned, attend lab meetings, professional development sessions, posted seminars, and conduct research as outlined by your mentor. Evenings and weekends may be required.
- Once you accept the internship, you will be obligated to work 40 hours per week for the full duration of the project, June 6 through August 5, 2022 and present your findings in an oral report and a poster on August 5.
- IMET will endeavor to provide summer housing for students from outside the Baltimore metropolitan area. If you need housing, please state that at on page 2.
- You will need to demonstrate that you are eligible for employment.

I represent and warrant that I have read and fully understand the foregoing, and that I seek employment under these conditions and agree to the above conditions. I attest to the accuracy of the information provided.

Please print your name to indicate that you understand and agree. Date
