

UNDERGRADUATE SUMMER INTERNSHIP

IMET and the University System of Maryland are committed to creating opportunities for a diverse body of undergraduates to enable and encourage students from underrepresented backgrounds to continue on to higher degrees and careers in marine and environmental science. To promote this we are offering paid summer undergraduate internships that include a nine-week research project in environmental, estuarine and marine sciences.

In-person lab experience

- Full Time
- Monday - Friday
- Includes seminars, workshops, and professional development opportunities

Internship Eligibility

- US citizen or permanent resident
- Undergraduate student in field related to biological sciences
- GPA of 3.0 or above
